Since I don't wear heavy makeup, a moisturizer is the ideal solution. I like it because it doesn't feel too thick on my face and it lets my skin breathe."

Feet treat

Your feet are on display much more in the summer, and it's never too late to pamper them a bit. When you take your shower or bath, take a few minutes to scrub away calluses with a pumice stick. As you dry your feet with a soft towel, gently push back your toenail cuticles. Then smooth a moisturizer all over your feet, especially on rough spots. If you're doing this in the evening, slip on a pair of absorbent cotton socks. While you sleep, your feet will get a softening treatment.

Why is it that ladies are usually so impressed with other people, other clothes, and other husbands?

Tired of worrying about utility bills?

A GE Plus-One Heat Pump System works with your forced-air furnace—gas, oil, propane or electric.

How does it work? Simple. A heat pump doesn't make heat. It moves heat! In summer, it works just like an air conditioner, pulling heat out of your home. In winter, it reverses, and pulls heat from outdoor air into your home (even at cold winter temperatures). Efficiently. Economically. Electrically. In fact, the Plus-One heat pump can supply all the heat you need until the weather's near freezing. Then, your forced air furnace takes over.

You're buying the No. 1 seller! The Plus One heat pump is part of General Electric's family of Weathertron® heat pumps, the number-one selling heat pump with GE's famous Climatuff compressor.
